LOOK FOR GREEN LIGHTS TO INCREASE VISIBILITY ON ROAD COMMISSION VEHICLES

To promote safer driving conditions this winter season the Road Commission of Kalamazoo County (RCKC) is beginning to install green lights alongside its amber lights to improve the visibility of maintenance vehicles like snow plows. With the passage of Public Act 161 of 2016, road commissions across the state used green lights to further alert you to maintenance vehicles and activities on the road, especially in adverse weather conditions. The green lights appear brighter and can be seen from farther away than other color lights, making them suitable for enhanced visibility and safety. **SO when you see green lights on maintenance vehicles, the RCKC is reminding you to please use caution, slow down and allow for safe operations during road maintenance activities.**
