ASSET MANAGEMENT

Asset Management is a systematic approach to selecting the best investment at the right time to maximize the life of the asset being measured, in this case, road surface conditions. The goal is to maintain our roads in good condition, making periodic investments in the pavement, rather than letting it deteriorate to a level that requires a major investment to bring it back to a good condition. Periodic maintenance investments typically total less than the major investment required to rebuild a road.

Legend

Preservation & Structural Improvement

— 2021

Road Classifications

- State Trunkline
- - - County Primary
- County Local
- County Local - Gravel
- - - City
- Private
