

CONSTRUCTION UPDATE

ML AVE AND 35TH ST TRANSMISSION WATER MAIN PROJECT

The City of Kalamazoo's ML Ave and 35th St transmission water main project will be continuing into trench excavation and water main installation within a month. Construction operations are expected to begin April 6th, 2026.

In preparation of the project, you may see a City of Kalamazoo, Jones & Henry Engineers, or Hunter-Prell representative stopping by to review the work zone. You may also notice flags, stakes, or paint marks in the right-of-way next to your property to stake out the location of the proposed water main, show existing utility locations, or mark other items required for construction.

Construction is set to start on ML Avenue and will require the closure of ML Avenue from 31st St to 35th St. Access will be maintained for residents, businesses, and emergency vehicles. There may be times you will not have access to your driveway for short durations. Access to individual driveways will be restored each day.
